PRINTING TIPS

Printing

- Offset printing
- Letterpress
- Silk-screen printing
- Blind embossing
- Hot foil stamping
- Paper etching
- Die cutting

Recommendations for offset printing

- Screens up to 80 l/cm
- Match litho to the paper color
- Proof printing on same paper stock
- Under color reduction when applying strong ink coverage

Low absorption of ink, therefore:

- Use of fully oxidative drying inks
- Print dusting, low printing stacks
- Careful drying, minimum of 24 hours

Special advice

- Acid free, pH-neutral
- The use of 100% waste paper as raw material can lead to small, varicolored inclusions. The look of the sheet, the color and the paper surface may vary slightly from one production to the next.
- Natural papers have a top side and a bottom side. It is recommended, to use the top side as the front side for the print project.
- For printing and processing, the recommendations of the manufacturers of machines, inks, glues, lamination and embossing foils etc. have to be followed. For any damages caused by improper application, Gmund cannot accept liability.
